

Alex Vance

SENIOR AI SYSTEMS ENGINEER

■ alex.vance@example.com | ■ +1 (555) 019-2834 | ■ San Francisco, CA | ■ linkedin.com/in/alexvance

CAREER OBJECTIVE

To lead innovative AI engineering teams in developing high-throughput LLM architectures and production RAG retrieval platforms.

SKILLS & TECH

- Python
- FastAPI
- Groq API
- LangChain
- PyTorch
- React
- TypeScript
- Tailwind CSS
- PostgreSQL
- Docker
- Git
- Vector Databases

CERTIFICATIONS

AWS Certified Machine Learning Specialist, TensorFlow Developer Certificate

LANGUAGES

English (Native), Spanish (Professional), Japanese (Conversational)

EXECUTIVE SUMMARY

High-impact Senior AI Engineer specializing in LLM production orchestration, RAG retrieval architectures, and scalable async Python microservices with a track record of boosting system performance.

PROFESSIONAL EXPERIENCE

Lead AI Engineer @ NeuralTech AI (2022 - Present)

- Architected enterprise RAG document retrieval engines using FAISS & Groq API, scaling query throughput by 300%.
- Engineered async FastAPI microservices handling 50k+ daily streaming requests.

Software Engineer @ DataFlow Systems (2019 - 2022)

- Developed React & TypeScript dashboards for real-time model monitoring.
- Optimized SQL queries reducing analytics latency by 45%.

FEATURED PROJECTS

NovaChat AI Platform

Production AI Platform with real-time SSE token streaming, multi-format file RAG Q&A, and single-page PDF generator.

EDUCATION

B.S. in Computer Science - University of California, Berkeley (2019)
